## Upgradeable Area-Imaging Scanner

Across many industries, 2D barcoding is the standard. Not only is it possible to hold much more data in a 2D code, but government regulations and supplier mandates are requiring their adoption. Enterprises are also looking to leverage emerging trends that require area-imaging technology – today or in the near future – without the need to purchase additional scanning hardware, or settle for reduced scanning performance.

The Voyager™ 1450g scanner allows enterprises to embrace area-imaging at their own pace, and in the most cost-effective manner. Built on the durable platform of Honeywell's world-renowned Voyager series handheld scanners, the Voyager 1450g scanner delivers omnidirectional reading of linear barcodes, plus the ability to affordably upgrade the device to enable PDF and 2D barcode scanning – either at the time of purchase, or as data capture needs evolve.

For those who only need the ability to read linear and 2D barcodes, the Voyager 1450g scanner is the perfect fit. It doesn't include additional area-imaging features such as advanced image capture and processing applications, allowing Honeywell to keep costs down while offering aggressive linear and 2D scanning at an attractive price.

The Voyager 1450g scanner offers an exceptional value for enterprises that require the versatility of area-imaging technology today or may need it in the future. Produced by a company with decades of experience in engineering-quality data capture solutions, the Honeywell Voyager 1450g area-imaging scanner is a durable and scalable investment.

*The Voyager 1450g scanner provides omnidirectional reading of linear barcodes, with the ability to affordably upgrade to PDF and 2D barcode scanning at your convenience.*

## FEATURES & BENEFITS
